

Certificate of Training For Class C Operators

I _____ certify that I trained the following employees as Class C Operators.
(Name of Class A or B Operator)

(Name of Trainees)	(Date Trained)

This certificate must be posted at the facility. A Class C Operator must be on site during hours of operation at attended facilities.

Class C Operator training must include items such as:

- ✓ Safe fuel dispensing (i.e. no smoking)
- ✓ Who to contact in the event of a fuel release or fire and what to do until help arrives.
- ✓ How to turn off dispensers in an emergency.
- ✓ Location of fire extinguishers.

- Each manned facility must have at minimum a Class C Operator on site when the facility is open for business.
- The Class A or B Operator must complete the “Certificate of Training” for all Class C Operators trained for the site. The certificate must be posted at the facility.
